PLASTIWORLD®

EXPORT ORIENTED PLASTIC PRODUCTS SHOW

04 05 06 NOVEMBER 2025

JIO WORLD CONVENTION CENTER, MUMBAI, INDIA

BOOST YOUR EXPORT BY 4X IN 3 YEARS!

GLOBAL SOURCING HUB IS INDIA

The world trade of plastics is about 1.2 Trillion US\$, where as share of India's export is merely 11.5 Billion US\$, which is about 1.1 % of the world. AIPMA has recognized this issue and has decided to come with a bold step by establishing an export cell to study the export of finished plastic products from India. Under this ambitious project we have identified top 21 countries importing > 70% of plastics products across the world. We have identified potential of plastic finished products such as household goods, packaging materials, bags & FIBCs, automotive components,, medical devices, toys, gift and festival decoration items etc for exporting to foreign markets. The launch of the PLASTIWORLD exhibition is a strategic move to engage with the world's top importing countries and showcase India's diverse range of products.

BENEFITS OF EXPORTING PLASTIC FINISHED PRODUCTS INCLUDE

Optimising Scale of Production

By using some capacities for export reduces fixed cost of unit and generating more revenue for manufacturers. Thus, creating scope for expansion and handing over more profitable business to GenX.

Market Access

The opportunity to connect with agents, explore markets, and access a wide range of business opportunities across 21 focused countries. This initiative is designed to help companies expand their reach and tap into new, high-potential markets.

Economic Growth

Exporting plastic products helps generate foreign revenue and boosts the economy by expanding market reach and driving industrial growth.

Innovation and Technological Advancements

Exposure to global trends and competition encourages companies to innovate, improve production processes, and adopt sustainable practices, such as recycling and reducing Plastic Waste.

4X Growth Opportunity in 3 Years

Exporting fosters international trade ties and cooperation, which can lead to long-term growth opportunities.

Improved Product Quality

By manufacturing your products according to international market standards, your domestic business will also get enhanced.
